Worksheets and lesson ideas to challenge students aged 11 to 16 to think hard about covalent bonding (GCSE and Key Stage 3) | A covalent bond is a shared pair of electrons|. But hang on a minute, surely a pair of electrons would repel each other and not form an attraction between two atoms. This makes no sense. Of course the covalent bond is far more than a shared pair of electrons and it's important to stress that a covalent bond is actually the electrostatic attraction between the ...
