With a Consolidation style, the master data is generally consolidated from multiple sources in the hub to create a single version of truth, otherwise known as the golden record. A golden record is stored in the central hub and used for reporting and reference. However, any updates made to the master data are then applied to the original sources.

~~InDesign User Guide — Adobe Inc.~~

Database-style DataFrame or named Series joining/merging¶. pandas has full-featured, high performance in-memory join operations idiomatically very similar to relational databases like SQL. These methods perform significantly better (in some cases well over an order of magnitude better) than other open source implementations (like `base::merge.data.frame` in R).
