This is crucial because this is where a lot of manufacturers begin to play with, and boost, the ratings above 2.5 in to the 3.5 and 4 HP range. In a lot of those cases, if we examine the plate stamped on the treadmill, you will find RPM ratings in the 7000 to 8000 range. This is how they can get away with these bloated HP rating numbers.

I tried to start my family-inherited [1957 Johnson 3-HP Seahorse] to find that it was only running on one cylinder. Interestingly, it still started. I think I am going to tear it down and do a rebuild, replace ignition parts, and possibly rings if it measures out.
